26 July 2016. At a workshop under the guidance of Peter Scharff and his team, industry professionals created, portioned and regenerated high convenience to a star level themselves and set out a picture of how the Torus-Pak® solution can be integrated into the complex processes of the kitchen and what economic benefits the straight-to-plate technology offers.

Photo credits: Torus Pak®.

Thanks to Peter Scharff and all the participants.

“SELF-MADE HIGH-CONVENIENCE” FOR PROFESSIONALS
Take a look into the future of the culinary food industry.

A UNIQUE PACKING SOLUTION WITH VERY HIGH STANDARDS OF QUALITY.

Torus Pak® has been developing and distributing the patented and award-winning Torus Pak® system since 2004. The easy-to-open meal trays can be individually filled and are perfect for all areas of cuisine, from basic catering to gourmet concepts.

The ingenious idea behind the special “simply serve” concept is the removable base film, guaranteeing simple handling, perfect hygiene from kitchen to plate and ultimately the perfect presentation of the meal on the plate. The single serving tray is one of the lightest on the market and the design is optimised for transport. Torus Pak® – the new generation of meal tray.
